

## **Andrei Jhoseph Gania**

Address: 787 Jane Street, Toronto, ON M6N 4B7

Phone: 437-324-8662

Email: andreijhosephgania@gmail.com

---

### **Objective**

Aspiring Full Stack Developer currently pursuing an Ontario College Advanced Diploma in Computer Programming and Analysis. Eager to leverage deep technical skills in Java, Python, Javascript and C# to develop innovative web solutions that enhance user engagement and performance.

---

### **Education**

#### **Computer Programming and Analysis, Diploma**

**George Brown College, Toronto, ON**

**Sept 2023 – April 2026**

**GPA 3.55**

Developed full-stack web applications using HTML, CSS, JavaScript, and React, implementing user authentication and dynamic UI rendering.

Designed and implemented a database management system using SQL databases like MySQL, PostgreSQL. Involved in creating database schemas, writing SQL queries, and implementing CRUD operations.

Built backend APIs using Node.js, Express, and GraphQL, integrating with MongoDB Atlas for data storage.

Collaborated in a team to create a software application from inception to deployment. This comprehensive project encompassed requirements gathering, system design, coding, testing, and documentation, utilizing languages such as Java, C#, JavaScript and Python.

Developed an inventory management system with AJAX that allows for real-time interaction, role-based authorization, and strong user authentication. Responsibilities included designing the user interface, implementing secure data handling practices, and developing scalable backend solutions with ASP.NET Core MVC and C#.

---

### **Projects**

PointSeven Cafe Mobile App (Capstone Project)

- Developed a mobile application using Android Studio (Java/Kotlin) with features including user authentication, inventory tracking, and staff scheduling.
- Integrated APIs using Retrofit and implemented local storage using Room Database.

#### Microservices DevOps Project

- Designed a distributed system using Spring Boot microservices, API Gateway, and Keycloak authentication.
- Containerized services using Docker Compose with PostgreSQL and Redis.

#### Employee Management System (GraphQL API)

- Built a backend API using Node.js, Apollo Server, and GraphQL with JWT authentication.
- Implemented CRUD operations and integrated with MongoDB Atlas.

#### Real-Time Chat Application

- Developed a chat system using Node.js, Express, and WebSockets/Socket.io for real-time communication.

#### Gomoku Game (Java)

- Created a command-line board game with turn-based logic, input validation, and win-condition detection.

---

## Experience

### Server

#### New Orleans Seafood & Steakhouse, Toronto, ON

May 2023 - August 2023

- Delivered high-quality customer service in a fast-paced restaurant, enhancing guest satisfaction and contributing to a significant increase in repeat business.
- Managed order accuracy and timely service, effectively handling a diverse and demanding clientele.
- Collaborated with kitchen and bar staff to ensure seamless service delivery.

---

## Skills

- **Programming Languages:** Proficient in Java, C#, JavaScript and Python

- **Software Development:** Experienced in developing user-centric software solutions and debugging complex issues.
  - **Frontend Development:** React, HTML, CSS, JavaScript (ES6+), AJAX
  - **Backend Development:** Node.js, Express.js, GraphQL (Apollo Server), REST APIs, Spring Boot
  - **Mobile Development:**  
Android (Java/Kotlin), SwiftUI (iOS)
  - **Frameworks/Technologies:** .NET Framework / .NET Core, Apache Maven, MySQL, PostgreSQL, MongoDB Atlas
  - **Tools:** Git, Visual Studio, Visual Studio Code, NetBeans, IntelliJ, Rider, NuGet, WebStorm, PyCharm, Postman, GraphQL, Docker, Keycloak
  - **Methodologies:** Agile, Scrum
  - **Team Collaboration:** Effective communicator and team player, skilled in working within collaborative environments to achieve project goals.
-
